ERECTION OF THE FAEROES LORAN-C TOWER

On 28 March 1962 the Hjde, Faeroes LORAN-C Station Antenna collapsed. Erection of a new tower has commenced with the arrival of the antenna parts and a contractor at the site.

As soon as the new antenna has been erected the Faeroes Station will commence transmitting the LORAN-C signals and the original chain configuration will be reinstated with this station as Master. Construction time is estimated at 8 weeks.
