SCV

31 July 1951

- The proposed budget for 1953 contains an item for construction of barracks and messing facilities at Hobe Sound Loran Station. In order that the site question may be fully cleared up by the time construction funds are available, it is recommended that immediate steps be taken to acquire the Geer property. Funds for the purchase can be made available from 20X0201 Operating Expenses, Subhead 43. Estimated cost is \$30,000.
- The entire situation is set forth in references (a) and (b), of which copies are inclosed for ready reference.
